a) Driving Patrol Vehicles (regular vehicles, bikes, snowmobiles, ATVs)

Injury or death from accidents or collisions with other vehicles

- Ensure that the patrol vehicle utilized by the Community Peace Officer(s) is suitable for the duties required. For example: If the majority of driving be on hilly terrain or gravel roads then a Sport Utility Vehicle 4 X 4 may be required.
- The patrol vehicle shall be inspected from bumper to bumper (or wheel to wheel for a bike) on a routine and frequent basis by a qualified mechanic. *Lac La Biche County vehicles shall be inspected every 10,000 kms.* Items of special interest include such things as: lighting, brakes, tires, emergency equipment, etc.
- Reflective striping/lettering can also assist in illuminating the patrol vehicle during low light conditions.
- Ensure that the Community Peace Officer(s) respects and obeys the current applicable rules of the road.
- If on a bicycle, snowmobile or ATV, a Community Peace Officer(s) shall wear a safety helmet and bright reflective clothing.

Driver Fatigue

- Do not operate a patrol vehicle if tired from lack of sleep, sickness, or taking prescription medication causing drowsiness.
- Community Peace Officer(s) will drive many kilometers each day; it is vital that they take several breaks to prevent fatigue. Simply pulling over onto a side road and stretching is often sufficient.
Striking Animals/Pedestrians

- Avoid driving on the shoulder of any highway, unless in an off-highway or all-terrain vehicle (ATV).
- To avoid backing over a pedestrian or objects, walk around your vehicle before getting in it.

Icy or Slippery Road Surfaces

- During the winter months, it is recommended that a Community Peace Officer(s) patrol vehicle be equipped with reliable winter tires for optimum traction.
- Patrol vehicles shall be equipped with ABS brakes.

Loss of concentration while talking on Cellular Phone

- Most Community Peace Officer(s) spend a lot of time on their cellular phones while inside a patrol vehicle.
- We recommend that patrol vehicles be equipped with hands free cellular phones or that Community Peace Officer(s) pull to the extreme edge of the road and stop while talking.

b) Traffic Stops, Emergency Responses

Injury or death from accidents or collisions with other vehicles

- When responding to an emergency situation, the Community Peace Officer(s) shall activate the patrol vehicle’s emergency lighting and siren.
- Even though the Community Peace Officer(s) is authorized to exceed the posted speed limit and proceed through stop signs, he/she shall still travel at a safe speed and be prepared to stop at intersections.

Adrenaline or Siren Syndrome

- The Community Peace Officer(s) can become disoriented during pursuits or during emergency responses while their sirens and emergency lights are activated. It is very important that Community Peace Officer(s) try and block out any distractions caused by flashing lights and siren.

Striking Pedestrians / Animals

- Refer to Part (a) of Section III

Being Stuck by a Passing Motorist
This section applies to the situation of a traffic stop, when the patrol vehicle is parked behind a violator’s vehicle on the side of the road, or when the Community Peace Officer(s) is standing beside the violator’s vehicle.

A Community Peace Officer(s) shall wear either a traffic vest or bright and reflective patrol jacket when standing beside a violator’s vehicle during a traffic stop. This practice shall make a Community Peace Officer(s) more visible to a passing motorist and the risk of being struck shall be minimized.

When a patrol vehicle is parked behind a violator’s vehicle on the side of a road during a traffic stop, the patrol vehicle’s emergency lights, especially to the rear, shall be activated.

Whenever possible, the Community Peace Officer(s) shall park their patrol vehicle in an offset portion of the road or its shoulder behind the violator’s vehicle to create a safe corridor for the Community Peace Officer(s) approach.

Uncooperative Subject

A Community Peace Officer(s) shall, from time to time, encounter a violator with a uncooperative attitude during a traffic stop.

The Community Peace Officer(s) shall try to encourage the violator to remain in his or her vehicle during the traffic stop to prevent the violator from being struck by a passing motorist, and to minimize the possibility of the violator assaulting the Community Peace Officer(s).

While dealing with the violator in a firm but fair manner, always keep at least two arms lengths from the violator to provide response time in the event the violator becomes an assailant.

In the event that an assault occurs, make every effort to guide the arrest procedure to the ditch or as far from traffic as space allows.

It is very important for Community Peace Officer(s) to have adequate communications in the event that immediate assistance is required. Minimum communications required are: a two-way radio linked to the nearest Police department and a cellular phone.

Training in Arrest & Restraint Techniques is recommended.

A Community Peace Officer(s) shall be equipped with and trained in the use of OC spray (“pepper spray”) and the ASP (tactical) baton.

A Community Peace Officer(s) shall have the means to communicate with a dispatcher or control center to advise:

- When he/she is coming on or going off duty.
- Details of any traffic stop or other situation where safety may be of concern while dealing with a violator or suspected violator.
- If he/she is driving to a certain destination for an extensive period of time.
Relating to the three aforementioned situations, the dispatcher or control center shall have the ability to contact a predetermined person(s), or agency, in the event that the Community Peace Officer(s) fails to call, via radio or cellular phone, within a pre-established time frame.

Risk of injury or death from weapons inside the violator’s vehicle

- A Community Peace Officer(s), during a routine traffic stop, may come into contact with criminals who possess illegal weapons and/or firearms. It is very important not to become complacent and to treat every traffic stop as high risk.
- Community Peace Officer(s) shall continually scan the interior of the violator’s vehicle for weapons and always know where the violator’s hands are. If the violator reaches into areas of suspicion, the officer will direct that person to keep his or her hands on the steering wheel or where they can be seen.
- When speaking with the violator at his or her vehicle, the Community Peace Officer will stand slightly back of the driver’s door so that the violator must turn back and to look at him or her. The officer will never place any part of his or her body inside the window, or stand directly in front of the driver’s door.
- In the event that a Community Peace Officer(s) stops a large semi-truck, he or she will direct the driver to exit the cab and report to the back of the trailer. The Community Peace Officer(s) will not climb up on the side steps of the cab. While the driver is walking to the rear of the unit, the Community Peace Officer(s) will check the passenger side of the truck to see if a passenger is walking to the back as well. If so, the officer will direct the passenger to wait inside the truck. While the driver is walking towards the back of the truck, the Community Peace Officer(s) will constantly scan that person’s body for weapons, and watch his/her hands.
- In the event that a Community Peace Officer(s) stops a motorcycle, have the operator remain on the seat and remove their helmet, and place it on the ground.
- Community Peace Officer(s) shall be issued and trained in the use of OC Spray and the ASP (tactical) Baton.
- A Community Peace Officer(s) shall be issued a bullet proof vest.

c) Motor Vehicle Accidents & Dangerous Goods Incidents

Injury or death from fallen power lines, explosions, chemical spills, etc.

- Upon arriving at the scene of a Motor Vehicle Accident or Dangerous Goods incident, the Community Peace Officer(s) shall assess the entire scene for hazards before exiting the patrol vehicle.
- If Dangerous Goods are suspected, the Community Peace Officer(s) shall be equipped with and utilize binoculars to determine the product involved by reading the numbers on the vehicle’s Dangerous Goods placards. The Community Peace Officer(s) will then
follow the recommendations listed in the latest edition of the Emergency Response Guidebook relating to Dangerous Goods Incidents.

- The Community Peace Officer(s) shall contact and dispatch the necessary emergency response personnel to the scene to control any hazards identified.

**Being Struck by Passing Motorists**

- An accident scene may on occasion be littered with debris and hazards to passing motorists. In addition, passing motorists tend to stare at the accident scene and take their eyes off of the roadway ahead of them.

- The Community Peace Officer(s) shall make every effort to render the accident scene safe by slowing, stopping or redirecting traffic. This can be accomplished by using pylons, road flares (if no flammable or explosive materials are suspected to be involved) emergency lights on the patrol vehicle, etc. These traffic control devices shall be kept in the patrol vehicle at all times.

- The Community Peace Officer(s) will wear either a traffic vest or reflective jacket, whether the Community Peace Officer(s) is conducting traffic control or other duties at the scene.

**Blood-borne & Airborne Pathogens**

- A Community Peace Officer(s) is at risk of disease or death while assisting medically or otherwise, at an accident or Dangerous Goods incident.

- Community Peace Officer(s) shall be equipped with and use rubber gloves and a facial barrier while dealing with an injured person or performing artificial respiration.

- In the event that a dangerous gas or chemical is suspected at a Dangerous Goods incident, a Community Peace Officer(s) shall stay upwind from the affected area, until the ‘all clear’ has been given by the Dangerous Goods response official.

- It is recommended that the Community Peace Officer(s) be immunized for protection from diseases or illnesses such as, but not limited to: Hepatitis, Tetanus, Influenza and Rabies.

- In the event that the Community Peace Officer(s) comes into unprotected contact with potential sources of disease such as blood, mucous or chemicals, he/she shall seek medical attention immediately.

**Illnesses from Cold and Inclement Weather**

- When a Community Peace Officer(s) is outside his or her patrol vehicle during cold or inclement weather, it is imperative that suitable clothing be worn to prevent illness.

- Community Peace Officer(s) shall be issued and wear a bright and reflective rain jacket while it is raining and a parka or similar winter jacket during cold weather.
• A toque or similar hat and gloves shall also be issued and worn by Community Peace Officer(s) when required.

d) **Weighing Large Trucks with Portable Scales**

Injury to back while lifting heavy scales

• Adopt safe lifting procedures while carrying portable scales. Always bend at the knees and not at the back to prevent back strain.

Improper Storage of Scales in Patrol Vehicle

• Store portable scales in a secure rack that will prevent the scales from becoming projectiles in the event of an accident or sudden stop.
• Store the scales at an appropriate height to prevent the Community Peace Officer(s) from bending at the waist and reaching down into a trunk to lift them.

Being Stuck by Passing Motorist

• Please refer to the hazard control methods above, in the Vehicle Pursuit, Traffic Stops and Emergency Response sections.

Truck Tire exploding while nearby

• After placing portable scales under tires, Community Peace Officer(s) will move at least 3 metres away from the tires being weighed, while the truck drives on top of the scales.
• Once the truck has stopped on the scales, the Community Peace Officer(s) can approach and obtain a reading.
• Before instructing the driver to mount the truck on the scales, the Community Peace Officer(s) will conduct a quick inspection of the tires about to be weighed for bulges or other danger signs. If a tire looks suspicious and could explode, do not weigh it with portable scales.

Dangerous Chemical Spills on an Officer

• Anytime a Community Peace Officer(s) weighs a truck hauling dangerous chemicals, he/she is at risk of being contaminated or otherwise injured by a chemical leak or sudden spray.
• The officer will continuously check for leaking valves or other signs of a possible leak.
• The officer will avoid standing near venting tubes as they can emit dangerous vapors.

- Please refer to this procedure manual in the Weighing Large Trucks with Portable Scales Section.

g) Arresting Offenders & Transporting Prisoners

Subject is an Assailant (resistant)

- The Community Peace Officer(s) will always maintain a safe distance from a subject to create an escape route and to increase response time.
- In accordance with training, the Community Peace Officer(s) will protect him or herself and gain control of the subject.
- After encouraging or assisting the subject to lie on the ground, the Community Peace Officer(s) will place handcuffs on the subject with arms placed behind his/her back.
- After conducting a search of the subject for weapons and evidence, the Community Peace Officer(s) will carefully place the subject in the back seat of the patrol vehicle.
• The Community Peace Officer(s) will radio the nearest Police department and advise them that he/she is transporting an assailant to their location to be lodged in cells.
• It is important that Community Peace Officer(s) be trained in the use of and issued OC spray (“pepper spray”) and an ASP (tactical) baton. These items may assist in the apprehension of an uncooperative subject or assailant and prevent serious injury or death to the Community Peace Officer(s) or innocent citizens.

Injury while Searching/Exposure to Blood-borne Pathogens

• Some subjects carry sharp objects such as hypodermis needles and knives on their person, particularly in pockets.
• Ask the subject if he/she has any of these items in their pockets before searching.
• While searching areas that can contain these items, wear puncture proof gloves or use an item such as an ASP (tactical) Batto to gently rub over the area before inserting an unprotected hand.

Risk of Injury or Death when Suspect is in Possession of a Weapon

• A Community Peace Officer(s) is at risk of being injured or killed when a subject is holding a gun, knife or other dangerous weapon.
• It is very important for the Community Peace Officer(s) to keep a safe distance while dealing with such a person. (A two-arm’s length is recommended while in interview stance and 20 to 25 feet for agitated or hostile subjects.)

Risk of Assault while Prisoner is in the Patrol Vehicle

• The Community Peace Officer(s)’ patrol vehicle shall be equipped with a “silent partner” (screen dividing front seat from rear seat) to transport prisoners.
• Prisoners shall always be handcuffed behind their backs while being transported.

Risk of Injury or Death due to bite or attack

• The Community Peace Officer(s) will be issued adequate gloves that cannot be punctured by the teeth of attacking animal.
• The Community Peace Officer(s) will be issued all the equipment required to capture a stray animal. These items may include: catch pole, nets, cages, etc.
• In the event that a Community Peace Officer(s) comes into contact with a vicious animal where it appears as though it may attack, and if the Community Peace Officer(s) fears for his/her safety, the Community Peace Officer(s) shall retreat and obtain further resources such as: tranquilizer rifle, (if authorized and trained in its use), assistance from others, etc.
Blood-borne Pathogens

- All Community Peace Officer(s) who perform animal control duties shall be afforded the opportunity to obtain immunization against diseases such as rabies.
- Community Peace Officer(s) will be equipped with adequate gloves that cannot be punctured by the teeth of an attacking animal

Being Struck by Passing Motorists

- As some animals may need to be captured on the side of the road or in the ditch, a Community Peace Officer(s) is at risk of being struck by a passing motorist.
- The Community Peace Officer(s) shall be issued and wear a traffic vest or other bright or reflective jacket that will increase his/her visibility to passing motorists.
- The patrol vehicle’s emergency equipment, light bar and directional arrow, shall be activated.

h) RADAR Investigations

Being Struck by Passing Motorist

- If conducting static RADAR while parked in a patrol vehicle, the Community Peace Officer(s) shall park only on driveways or side roads, etc. It is not recommended that a patrol vehicle park on the shoulder of any highway to conduct static RADAR.
- If conducting laser or hand held RADAR operations, the Community Peace Officer(s) shall wear the same attire that he/she would wear during a traffic stop to minimize visibility concerns.

Risk of Injury from RADAR beam to body

- It is recommended that Community Peace Officer(s) use RADAR antennas that are mounted on the dash or hang from the window of the patrol vehicle, and are continuously aimed at the road surface.
- The use of hand-held RADAR devices is not recommended as they can be accidentally directed towards someone.
- Note: No studies have shown that hand-held RADAR devices can produce injury, unless aimed into the eyes of a person.

CONCLUSION
The Recommended Hazard Control Methods listed in this document are not intended to be the ultimate directive of the proper methods of performing the duties of Community Peace Officer(s).

The Hazard Control Methods shall be interpreted instead as being recommended methods of minimizing the risks associated with the Community Peace Officer(s) position.

The Community Peace Officer(s) performs a specialized and unique task, which can become very dangerous. The Alberta Association of Community Peace Officer(s) and its Officer Safety Task Force, desire that no Community Peace Officer(s) is ever placed into a situation where his/her safety is in jeopardy.

In the event that an employer directs a Community Peace Officer(s) to perform a specific hazardous duty not listed in this document, we strongly recommend that a Hazard Assessment be performed prior to that duty. It could be found that the Community Peace Officer(s) requires additional resources or manpower to perform that specific hazardous duty. The Community Peace Officer(s) may refuse to perform a duty if the situation is unsafe or uncomfortable, at their discretion.
