LAC LA BICHE COUNTY POLICY

TITLE: PREDATOR CONTROL POLICY  POLICY NO: PI-62-010
RESOLUTION: 14.608  EFFECTIVE DATE: FEBRUARY 22, 2011
LEAD ROLE: MANAGER, ENVIRONMENTAL & AGRICULTURAL SERVICES
NEXT REVIEW DATE: AUGUST 12, 2019
SPECIAL NOTES/CROSS REFERENCE: AMENDMENT DATE: AUGUST 12, 2014
PI-62-010 Predator Control Procedure

POLICY STATEMENT:

Lac La Biche County recognizes that agricultural producers need to take responsibility for livestock predatory losses and do everything to prevent these losses. However, producers who have adopted good husbandry may require Lac La Biche County’s assistance via additional tools to mitigate inventory loss.

PROCEDURE:

1. Predator Control Information will be available to all residents within Lac La Biche County.

2. Control work shall be provided on a first come first serve basis.

3. The Agricultural Fieldman or designate shall discuss prevention, control techniques, and management strategies with the landowner.

4. If the Agricultural Fieldman and landowner mutually agree Lac La Biche County may send staff to place neck snares on the residence’s private land or crown land leases to control predators using Alberta Agriculture and Forestry approved snares.

5. If Lac La Biche County staff place snares on private land a hold harmless agreement must first be in place between Lac La Biche County and the landowner.

6. If toxicants are to be used, the proper forms supplied by Alberta Agriculture and Forestry are to be used.

7. These forms shall be completed in full and signed by the landowner/lessee before any toxicants are provided.

8. Residents will be provided a maximum of six (6) tablets per predation occurrence.

9. The Agricultural Fieldman or designate will not issue toxicants if it is of their opinion that public safety could be at risk.

10. The Agricultural Fieldman may refuse to issue toxicants if in the opinion of the inspector the resident is not showing good stewardship through:

    (i) Use of alternative methods of predator control through fencing, snaring or the use of guardian dogs.

    (ii) Adequate safety or management of the toxicant.
11. The Agricultural Fieldman will instruct resident in toxicant use. Resident will be expected to set out and supervise toxicant sets according to the Form 8 provided by the Agricultural Fieldman or designate.

12. The Landowner shall contact any adjacent landowners, forewarning them that potentially harmful predator control mechanisms are being set.

13. All toxicants to be used for control work shall be set according to the Alberta Coyote Predation Management Programs Operation Policy and Procedure as amended from time to time.
