

Lac La Biche County
welcoming by nature.

February 22, 2021

Dear Property Owner/Resident:

Lac La Biche County Council has approved funds in the County's 2021 capital budget for 101 Avenue Surface and Utility Revitalization – 103 Street to 105 Street. You and other property owners in the project area are receiving this notice for your information, as the project may affect you during the construction stages.

The timeline for this project has not been finalized. You will receive an official Notice of Construction with additional details when the construction start date is approaching. Please note, however, that there will be preconstruction activity during the engineering process.

Lac La Biche County is committed to improving local infrastructure, and to providing residents with information about construction activities that affect them. To this end, the County has implemented a new process for notifying property owners in all areas where construction is planned, throughout the municipality.

A full list of current and planned capital projects is available on the County's website (www.laclabichedcounty.com). Hover over "our services" and click on "Current Construction Projects."

Your patience and cooperation with us as we complete this important work will be greatly appreciated. If you have questions or concerns about this project, please call Ali Memon, Manager of Engineering Services, at 780-623-6801 or via email at ali.memon@laclabichedcounty.com.

Sincerely,

Lac La Biche County
